

WHAT TO DO IF: Smoke / Fire Alarm Activates

*Consider all activations of a Smoke/Fire Alarm as real. *“Please use some of the following key points to form a plan”*

- Quickly move your family from the home to a safe location
 - Outside away from the home
 - To a neighbor’s home
- Call for help – Dial 911
 - Do Not re-enter the home to use the phone
- Wait for the Fire Dept. to check the home before re-entering.

*Having a family action plan will insure that your family will all be doing the same thing and meeting at the same point without delay.

Many deaths have occurred from family members re-entering the home to find pets. As you exit the home, leave one of the doors open for the pet to find their way out, and call for them. **NEVER RE-ENTER!!!!**

*In some cases at the point of the first sign of fire to the complete engulfment of the home takes only 10 minutes.
